C A T A L O G

2 0 2 1

We are a **family business** from Otwock in Mazovia, where for over 30 years we have been cultivating the art of creating pasta. After a turbulent beginning, we gradually began to expand our awareness and knowledge of pasta crafts, which resulted in the improvement of the quality of our products. We replaced the powder and egg mass with **freshly beaten eggs from local farms**, with whom we still cooperate. As a result of removing turmeric from the list of ingredients, the mixing techniques, the raw materials and drying the dough, we are able to offer our egg pasta in its **natural color**. In terms of technology, we have abandoned the pasta laminating procedure, so popular in Poland, focusing 100% on the al bronzo method, adored by traditional Italian manufacturers, i.e. pressing the dough on **bronze dies**. Due to this, our products are characterised by a specific, rough surface, which ensures excellent absorption and adhesion of sauces and dressings to the surface of the pasta. The high quality and safety of our products is confirmed by numerous certificates - **ISO 9001**, **HACCP** and, above all, **IFS**, which is one of the most restrictive food safety systems in the world.

In 2007, as one of the first Polish pasta manufacturers, we introduced bio pasta made only from **certified organic raw materials**, the portfolio of which we have been gradually expanding to this day.

We supplement the above-mentioned elements of craftsmanship and naturalness with the **innovation** of our activities. By carefully observing the changing preferences of consumers, we are constantly expanding our range with new products, we want to be a precursor of trends on the pasta market. We offer over **80 products**, including lines of traditional pasta made from freshly broken eggs, artisan pasta of various shapes and colors, wheat-free, organic, functional and finally those dedicated to kids. Numerous expressions of appreciation from distributors and clients, as well as the growing interest in our products on the markets in various parts of the world, confirm our belief that the direction we have chosen - determined by diligence, simplicity, innovation and honesty towards the customer - is right.

MADE
IN POLAND

TRADITION

Pasta inspired by Polish culinary tradition,
made purely from water, wheat flour and
fresh eggs from local farms
